NATIONAL HYPALON (WATER PROOFING)

PRODUCT DESCRIPTION

National Hypalon is a single component solvent based, Hypalon rubber based, highly flexible, tough and durable waterproofing and protective coating. It provides a flexible elastomeric seamless membrane with excellent adhesion. It can absorb the possible shocks caused by the contraction and expansion of substrate surfaces and has excellent solar heat reflection property. It has a very low flame spread property. It offers excellent resistance to water, chemicals and U.V. rays.

RECOMMENDED USES

National Hypalon is recommended as waterproof coating for concrete roofs, basements, kitchens, bathrooms, domes, wooden surfaces, toilets etc. of interior/exterior applications, where extremely strong protection required against water. For better protection, if required, can be reinforced with National Fibre Glass Mesh, while the intermediate coat is wet. It can hide the hairline cracks on surfaces and reduce the impact of harsh atmospheric conditions. It can also be used as the base coat application for helipad.

DRYING TIME

Drying time @ 30ºC (Temperature, humidity, air movement, film thickness and number of coats all affect the drying time.)

| TOUCH DRY | 2 – 3 hours |
| DRY TO RECOAT | 6 – 8 hours |
| DRY TO OVER COAT | 24 hours |
ADVANTAGES

NATIONAL HYPALON

Superior water proofing and protection, high elongation and tensile strength, excellent UV and weather resistance, excellent adhesion, very good impact resistance, low flame spread, excellent heat reflection, seals hairline cracks on surfaces, better durability.

APPLICATION INSTRUCTION

SURFACE PREPARATION

Before application, the surface should be sound, clean and free from oil, grease, loose particles, dust, etc. Application can be done by the recommended application methods.

APPLICATION DATA

APPLICATION METHOD
Brush, Roller, Spray etc.

CLEANING/THINNING
National Hypalon Thinner

THINNER (VOLUME)
Depends on the method of application

CONV. SPRAY REQUIREMENTS
Possible

AIRLESS SPRAY REQUIREMENTS
Pressure : 2000 – 2500 psi

NOZZLE SIZE
0.018” – 0.021”

MIXING RATIO (BY VOLUME)
NA

POT LIFE @ 30ºC (100 ml)
NA

SYSTEM

RECOMMENDED SYSTEM
To be applied on prepared surface. Recommended to apply in such a way that, minimize ponding of water and to improve surface drainage, on wet application.

National Hypalon (Diluted) as Primer coat : 1 coat
National Hypalon (Intermediate coat) : 1 coat
Reinforce National Fibre Glass Mesh (if required) while the intermediate coat is wet
National Hypalon : 2 – 3 coats

ADDITIONAL DATA

SHELF LIFE @ 30ºC
18 months, in original sealed container, with proper storage conditions.
### HEALTH & SAFETY

| SAFETY PRECAUTIONS | As a general rule, avoid skin and eye contact by wearing overalls, gloves, goggles, and mask etc. Spillage on skin should immediately be removed by thorough washing with water and soap or suitable cleaner. Eye should be flushed with fresh water. Avoid inhalation of vapours and paint mist by wearing suitable mask. In the event of ingestion and eye contact, seek medical attention immediately. Painting must be carried out in well-ventilated area. This product contains flammable materials and should be kept away from the sparks and open flames, smoking in the area should not be permitted. Local safety regulations should be followed. |

### STORAGE & HANDLING

| STORAGE | Store the paint in proper storage conditions as per the local regulations. Keep the paint container in sealed condition under shed, away from direct sunlight and extreme temperatures. Do not stock paint material near to any ignition sources. Do not put back the half or unused material back in original container, containing the supplied paint, to avoid contamination. Handle with care. Stir well before use. |

**NOTE:** We warranty only the quality of our product and this data sheet is based on results obtained from experience and tests. We reserve the right to change data without prior notice. For surface preparation, safety details refer specifier and safety data.
